

I travel someplace every week. I have found that the weather and traffic services provided by XM are not and cannot be provided by any local station. You see one day I might be in Oklahoma and driving to California. Their service has help me many times and I am hopeful you will not take it away from me. When I am in local markets for anytime at all I do listed to the local stations. But when I am traveling I listen to XM for their traffic and weather information. Please understand this is a service no other station can and will provide. Thank you for your consideration.
